

## GB Personal Message to J Earl post Unanswered Call -15-08-19

Jase, George (obviously), just tried to call you as know you often work late and obviously in response to your "IT resignation email you sent various parties today".

Thought perhaps could expedite various matters and save all a lot of time and painful back and forth(s) if we could speak direct to each other on the extensive list of matters at RANsquawk.

Aware you will / would inevitably be recording any conversation and reflectively I guess I will feel obliged to do the same.

But as say just might help yourself and yes maybe also my family and people I care about but also be in the best interests thereto also.

As I always said in my humble opinion it was you and I that had the ability to generate value but there have been many false assumptions/ blame and ultimately negative events in recent times.

Anyway obviously was not easy to make the call but you can yes take it that I have reached out because i feel just maybe it will help people specifically you and my family move forward with their lives and enable you and those due to realise some value from the current situations at RANsquawk.

For the record your assumptions and allegations and I think actual beliefs are wrong and have been for a long time but regardless perhaps there is still opportunity at hand.

Anyway hard to explain on text etc - but I have called and if you wish to call back I will answer and as say maybe some positivity can be salvaged.

In the meantime I will continue and try and assist matters as best I can and some as you may find confrontational and not to your liking but that i and others simply just believe correct.

But as say if you want to call then I will answer and try and talk openly as I say.

Regards g

Not sure if you will get this as you may have blocked my number so will ask mum to send from her mobile too.

Over to you know but as say will chat regardless of formal correspondence at least I guess until any eventuality as may make untenable.

And for the record I have been very unwell but have just tried to help where I can. But I doubt you will believe this and arguably now somewhat irrelevant.

Hope you call but as say leave with you now as I have tried. George
